Light Cloud™ Reusable Foam Positioners

David Scott Company has serviced the medical industry for more than 30 years. Our company focus is divided into two main areas; Manufacturing and Distributing. We have designed and developed a complete line of positioning aids aptly named Blue Diamond®. Under this line we offer viscoelastic polymer positioners, Light Cloud™ resposable head positioners, 4 levels of pressure reducing O.R. table pads, BeanBag positioners, as well as a comprehensive line of O.R. accessories.

David Scott Company is a major distributor of medical supplies. Our 30+ years of industry presence and buying power provides us the ability to supply medical products that best suit our customers' needs and budget.

Blue Diamond® viscoelastic polymer gel pads and positioners are designed to simulate human adipose tissue composition. This will greatly reduce the risk of decubitus ulcers caused by sheer friction. Independent studies have proven the superiority of gel as compared to foam and other conventional positioning and pressure reducing products.

Blue Diamond® products are manufactured to the highest standards. We back our complete line of products with a "customer-satisfied" guarantee.

Blue Diamond®
viscoelastic polymers facts:

- 100% latex free
- X-ray translucent
- Antimicrobial
- Antibacterial
- Plasticizer free
- Reusable
- Easily Cleaned
- Gel will not leak or ooze
- Gel is self healing
- Gel will not evaporate
- Ability to be heated or cooled

Our **Blue Diamond®** gel products contain no water, which will evaporate and change gel composition over time.

FOOT, HEEL, KNEE, & STIRRUP PROTECTION

Having the proper padding, cradling and support is essential for any procedure. Our product line consists of a variety of Blue Diamond® gel pads, pole pads for traditional Candy Cane Stirrups, and Boot pads for any Lift Assisted Stirrups. Utilizing foot cradles and heel lifts adds to patient comfort and circulation.

GEL FLAT BOTTOM POSITIONER ROLLS

Blue Diamond® roll positioners are designed to offer versatility. Our rolls are rounded on the end to allow for axillary usage. The thermoformed skin is very forgiving yet extremely durable. These rolls are perfect for wedging, elevating, distending, padding, and keeping the patient in proper position without fear of flattening the pad or rolling over it.

ANY PAD... FOR ANY TABLE... ANY STYLE!!!

O.R. TABLES

CT TABLES

HAND TABLES

All of our pads are constructed with Waterfall Edges, Sealed Perineal Seams, and Velcro® Kits.
All O.R. Table Pads are available in the following configurations:

STANDARD SERIES (Original Table Pad Design)

The most economical choice for short to average duration cases. This pad has a conductive Lectrolite® covering, designed similar to your original pad.

SHEERGUARD SERIES (SG) (High Density Foam & Enhanced Cover)

Offers high-density foam similar if not superior to your original table pad with the added benefit of a Fusion III® 4-way stretch supple covering. This pad allows for a more contoured fit to the patient.

ULTRACARE SERIES (UC) (Multi Density Foam & Enhanced Cover)

Designed for pressure management these pads offer all the benefits of the Sheerguard Series (high-density base foam and Fusion III® covering) plus a top layer of doughy soft cradling Visco memory foam.

COMBO SERIES (COMBO) (Tri-Level Design w/ Blue Diamond® Gel)

Our most comprehensively designed pressure management system. Our unique tri-level design has high-density supportive base foam, topped with a layer of doughy soft cradling Visco memory foam, and a layer of Blue Diamond® Gel protected just below the surface of an ultra soft 4-way stretch Fusion III® material covering.

FOAM STRETCHER PADS

All of our stretcher pads are covered in a heavy duty black Naugahyde for an extremely durable yet comfortable feel. Each pad comes standard with new Velcro® kits and rounded corners, unless the corners are specified mitered, or squared. We recommend the option of adding a layer of our Blue Diamond® gel to maximize patient comfort and reduce the chance of pressure sores.

Boston Fire Code stenciling, and waterproof seams available as options.

BEANBAG POSITIONERS

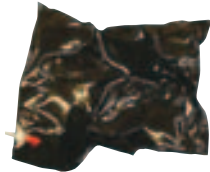

Our BeanBag positioners offer some tremendous benefits; the black urethane film repels staining far superior than other traditional vinyl BeanBags. The valve system is replaceable if compromised (saving hundreds in replacement costs). All of our BeanBags have an optional gel overlay available. The 40"x30" & 46"x46" BeanBags have "U" shaped shoulder cutouts. The 40"x30" BeanBag has an added flap to affix instruments without damaging the bladder.

LIGHT CLOUD™ RESPONSABLE HEAD / PRONE FOAM POSITIONERS

This responsible foam product offers an excellent cost savings alternative while having full pressure management attributes. These products are truly unique and wonderful. The doughy soft Viscoelastic memory foam is molded to shape and the thin flexible skin is puncture and tear resistant. Our Light Clouds™ can be cleaned and reused until the skin has become compromised.

PATIENT RESTRAINTS

OTHER SIZES & STYLES AVAILABLE

Our patient restraints are available in different lengths and styles. Our catalog represents the restraints that we have found to be most popular. We recommend the addition of a removable gel layer, which will reduce the risk of shear and pressure points. Custom lengths and styles are available.

LITHOTOMY/GYNECOLOGY/UROLOGY

BD100

Our private label pneumatic lift assisted stirrups are designed to travel a full 120 degrees, from 90 degrees to -30 degrees. They lock tight wherever you release the rotating hand grip locking mechanism. The abduction and adduction are done at the handle with no need to ever go back to the side rail socket. The stirrups rotation is designed to mimic the natural motion of the patients' hip which should reduce the risk of unnecessary trauma. The advanced boot system offers LATERAL SUPPORT to reduce potential nerve damage. The boot liner is constructed of doughy soft material that fully encapsulates the patient's foot. Our BD100 lift assisted stirrups offer patient support of up to 500 lbs.

**This system even includes low profile rail clamps.
The BD100 COMES COMPLETE, No add-ons to buy!**

BD100

BD150

DSC-30015 Stirrup Cart

BD150

Our private label pneumatic Bariatric lift assisted stirrups are designed to handle up to an 800 lb. patient. Uniquely designed advanced boot system has a raised lateral fin and a flexible contouring design to accommodate varied calf sizes. The doughy soft clamshell bootliners fully encapsulate the patient's foot. These stirrups have a squeeze trigger handle that allows you to exact position and lock in with ease and safety. The range of lithotomy is +84 to -33 degrees, as well as +25 to -9 abduction. As with our BD100 stirrups this system comes complete with pads and clamps.

HIP/SHOULDER

BD050

A simple, versatile, feature-packed Shoulder/Beach chair. The BD050 provides unhindered bilateral access for shoulder and upper arm procedures. The unique ball socket design on the head restraint prevents undue stress on the patient's neck during positioning of the chair. An integral handle allows for smooth positioning into five different popular degrees of positioning. The head restraint can be removed for optimal anesthesia access and then replaced after intubation. The BD050 includes the following accessories; Integral side rails, restraint strap for the non-affected arm, lateral brace and removable pads.

BD050

BD-3S

Our adjustable shoulder brace is designed to support without creating pressure on the brachial plexus, protecting against nerve damage. Excellent when used during Trendelenburg aided procedures.

DSC-UPB-3LS

This 3 piece system is superior for total hip procedures requiring maximum lateral stability. The ball and socket design on brace pads themselves allow for precise placement against the varied contours of your patients' anatomy. Once exact angles are achieved all 3 braces can be locked into position.
